ABSTRACT

In this paper, we do a mass balance on the human body. We determine the 12 balanced chemical equations that control all aspects of the body. They boil down to the carboxylic acid, Acetic Acid CH₃-COOH. This formula can serve as a proxy to see how chemicals react in the body. There is lots of literature on Acetic Acid.

INTRODUCTION

We've boiled down the chemistry of the human body to 11 balanced chemical equation. Then we did a mass balance which confirms that the equation for the human body is the GMP.

The SUM of the Reactinas = $2337 \times 6.022 = 14074$

$$t = e^M = e^{1.40746} = 408556$$

$$GMP: E = 11.606 = 1/861$$

$$\text{Acetic Acid } CH_3COOH = 111.15 \text{ g/mol } \times 6.022 = 669.32$$

$$t = e^{0.66932} = 19529$$

$$GMP: E = 0.861$$

$$1/0.861 \times 861 = 1.000$$

$$L = \ln t + c^3$$

$$L = \ln t + 27$$

$$= 3 + 27$$

$$= 30$$

$$30/2 = 15 = 3 \times 5 = tE$$

$$1.5^2 - 1.5 - 1 = -0.25 \sim -0.249$$

CONCLUSION

We confirm that the GMP is the function of the human Body. It is also the function of the human mind. The mass balance yields acetic acid to model the human body. Seeing the reactions involving acetic acid should shed light on how the body reacts with various chemicals.
